

◆ 1. CORE MODULES (Detailed Understanding)

(Missing Features)

1. Lead Management –

◆ Lead De-duplication

Explanation:

When the same customer submits details multiple times (through website, ads, or manually), CRM should automatically detect duplicates using phone/email and merge them.

Example:

A customer fills a form twice → instead of creating 2 leads, CRM updates existing lead → avoids confusion and multiple calls.

◆ Lead Queue

Explanation:

All new leads first go into a **common pool (unassigned bucket)** before being distributed to sales reps.

Example:

100 leads come from campaign → stored in queue → manager assigns based on priority or availability.

◆ Territory-based Assignment

Explanation:

Leads are automatically assigned based on **location, industry, or category rules**.

Example:

All Bangalore leads → assigned to Bangalore sales team automatically.

◆ Lead Aging

Explanation:

Tracks how long a lead has been idle without action. Helps avoid missing opportunities.

Example:

Lead shows “No follow-up for 4 days” → system highlights in red → manager takes action.

◆ Lead Recycling

Explanation:

Inactive or ignored leads are reassigned to another salesperson.

Example:

Lead not contacted for 5 days → auto reassign to another rep → increases conversion chances.

◆ UTM Tracking

Explanation:

Tracks exact source of lead from marketing campaigns (Google, Facebook, etc.).

Example:

Lead shows: *Source = Google Ads, Campaign = Diwali Offer* → helps measure ROI.

◆ Social Media Lead Capture

Explanation:

Automatically captures leads from Facebook/LinkedIn ads into CRM without manual entry.

Example:

User fills Facebook form → instantly appears in CRM → sales calls immediately.

◆ Marketplace Integration

Explanation:

Integrates platforms like IndiaMART so leads come directly into CRM.

Example:

Customer enquires on IndiaMART → lead auto-created → assigned to sales rep.

2. Contact Management – Detailed

◆ Contact Segmentation

Explanation:

Grouping contacts based on behavior, interest, or status.

Example:

Tag customers as “Hot Leads”, “Cold Leads”, “Existing Clients” → helps targeted follow-ups.

◆ Multiple Contacts with Roles

Explanation:

One company can have multiple people with different roles.

Example:

CEO (decision maker), Manager (influencer), Accountant (billing contact).

◆ Bulk Import with Validation

Explanation:

Upload large contact data while system checks errors/duplicates.

Example:

Upload Excel → system flags missing phone numbers or duplicate emails.

◆ Contact Merge

Explanation:

Combine duplicate contacts into one unified profile.

Example:

Same person saved twice → merge into one → avoids confusion.

3. Account Management – Detailed

◆ Account Segmentation

Explanation:

Categorize companies based on size, industry, or value.

Example:

Filter “Manufacturing companies with turnover > ₹10 Cr”.

◆ Multiple Address Support

Explanation:

Store different addresses for the same company.

Example:

Head office + warehouse + branch locations.

◆ Account Activity Summary

Explanation:

Single view showing all interactions related to account.

Example:

View deals, calls, invoices in one dashboard.

◆ Credit Limits

Explanation:

Set financial limit for customer transactions.

Example:

Customer cannot place new order if limit exceeded.

4. Deal Management – Detailed

◆ Kanban View

Explanation:

Visual pipeline where deals move across stages.

Example:

Drag deal from “Proposal” → “Negotiation”.

◆ Deal Splitting

Explanation:

Multiple sales reps share revenue or responsibility.

Example:

2 reps handled deal → each gets 50% credit.

◆ Product Line Items

Explanation:

Attach products/services within a deal.

Example:

Deal includes 5 laptops + 2 services.

◆ Deal Reminders

Explanation:

Alerts before important deal milestones.

Example:

Reminder before closing date.

5. Campaign Management – Detailed

◆ Multi-channel Campaigns

Explanation:

Run campaigns across email, SMS, WhatsApp together.

Example:

Send offer via email + WhatsApp simultaneously.

◆ Campaign Automation

Explanation:

Automated follow-ups without manual effort.

Example:

If no response → send reminder after 2 days.

◆ Lead Attribution

Explanation:

Tracks which campaign generated revenue.

Example:

Campaign X generated ₹5 lakh sales.

◆ Campaign Templates

Explanation:

Pre-designed reusable campaigns.

Example:

Festival campaign reused every year.

6. Task Management – Detailed

◆ Recurring Tasks

Explanation:

Tasks repeat automatically.

Example:

Daily follow-up call task.

◆ Task Dependency

Explanation:

One task depends on another.

Example:

Send proposal only after meeting is done.

◆ Escalation Rules

Explanation:

Alerts when tasks are delayed.

Example:

Manager notified if task is overdue.

◆ Task Templates

Explanation:

Predefined task sets.

Example:

“New Lead Workflow” creates 3 tasks automatically.

7. Meetings & Calls – Detailed

◆ Call Recording

Explanation:

Stores all call conversations for review.

Example:

Manager listens to improve sales quality.

◆ Call Disposition

Explanation:

Tag outcome of each call.

Example:

Interested / Not Interested / Callback later.

◆ IVR

Explanation:

Automated call routing system.

Example:

Press 1 for sales, 2 for support.

◆ Power Dialer

Explanation:

Automatically calls leads one after another.

Example:

Sales rep calls 100 leads without manual dialing.

◆ WhatsApp Tracking

Explanation:

All chats recorded in CRM.

Example:

Conversation history visible to team.

◆ 2. ADDITIONAL CRM MODULES (Detailed Understanding)

User & Role Management – Detailed

◆ Field-level Permissions

Explanation:

Controls who can edit or view specific fields within a record.

Example:

Sales rep can view deal amount but cannot edit it, while manager can edit.

◆ Data Visibility Rules

Explanation:

Defines who can see which data based on hierarchy or role.

Example:

Sales rep sees only their leads, manager sees entire team data.

◆ Role-based Dashboards

Explanation:

Different users see different dashboards based on their role.

Example:

Manager sees revenue & team performance, sales rep sees only their targets.

Workflow Automation – Detailed

◆ Multi-step Workflows

Explanation:

Automates a sequence of actions based on conditions.

Example:

If lead is “Hot” → assign to senior rep → send email → create follow-up task.

◆ Time-based Triggers

Explanation:

Triggers actions after a specific time delay.

Example:

Send reminder email 24 hours after first contact.

◆ Event-based Triggers

Explanation:

Triggers actions when something happens in CRM.

Example:

If lead status = "Not contacted" for 3 days → notify manager.

◆ Workflow Templates

Explanation:

Predefined automation setups that can be reused.

Example:

Use "Lead Follow-up Template" for every new campaign.

Reports & Dashboards – Detailed

◆ Custom Report Builder

Explanation:

Allows users to create reports without technical help.

Example:

Select fields like "Lead Source + Status + Revenue" → generate report.

◆ Scheduled Reports

Explanation:

Automatically sends reports at fixed intervals.

Example:

Daily sales report emailed to manager every morning.

◆ Sales Forecasting

Explanation:

Predicts future revenue based on current pipeline.

Example:

System shows expected ₹10 lakh closing next month.

◆ Team Performance Comparison

Explanation:

Compare productivity of different sales reps.

Example:

Rep A closed ₹5 lakh, Rep B closed ₹2 lakh.

◆ Funnel Reports

Explanation:

Shows conversion drop at each stage.

Example:

100 leads → 50 qualified → 10 deals → helps identify weak stage.

Email Integration – Detailed

◆ Email Templates

Explanation:

Pre-written emails for quick communication.

Example:

Use “Introductory Email Template” for new leads.

◆ Bulk Email

Explanation:

Send emails to multiple contacts at once.

Example:

Send offer to 500 leads in one click.

◆ Email Scheduling

Explanation:

Send emails at a later time automatically.

Example:

Schedule email for tomorrow morning 9 AM.

◆ Shared Inbox

Explanation:

Multiple team members access one email account.

Example:

sales@company.com handled by 3 team members.

Document Management – Detailed

◆ Document Templates

Explanation:

Standard formats for contracts, proposals.

Example:

Auto-generate agreement with customer details.

◆ E-signature

Explanation:

Allows customers to sign documents digitally.

Example:

Customer signs contract online without printing.

◆ Access Control

Explanation:

Restricts document visibility.

Example:

Only managers can view legal contracts.

◆ Expiry Tracking

Explanation:

Tracks validity of documents.

Example:

Contract expiring in 30 days → alert generated.

Activity Timeline – Detailed

◆ Filtering

Explanation:

View only specific types of activities.

Example:

Show only calls or only emails for a lead.

◆ Internal Tagging

Explanation:

Team members can tag each other in notes.

Example:

“@Manager please review this deal”.

Notifications – Detailed

◆ Escalation Alerts

Explanation:

Notifies higher authority when something is delayed.

Example:

Deal stuck for 5 days → manager notified.

◆ SLA Alerts

Explanation:

Ensures response time commitments are met.

Example:

Lead must be contacted within 1 hour → alert if missed.

◆ Custom Notification Rules

Explanation:

User-defined alerts based on conditions.

Example:

Notify when deal value > ₹10 lakh.

◆ 3. CRM CONNECTIVITY (INTEGRATIONS) – Detailed

External Integrations – Detailed

◆ WhatsApp API

Explanation:

Connect CRM with WhatsApp for communication.

Example:

Send quote directly to customer via WhatsApp.

◆ SMS Gateway

Explanation:

Send automated SMS messages.

Example:

Send OTP or appointment reminder.

◆ Marketplace Integration

Explanation:

Sync leads from platforms like IndiaMART and TradeIndia.

Example:

Customer enquiry on platform → lead auto-created in CRM.

◆ Ads Integration

Explanation:

Capture leads from online advertisements.

Example:

Facebook lead form → directly enters CRM.

◆ LinkedIn Integration

Explanation:

Capture B2B leads and interactions.

Example:

LinkedIn campaign leads synced automatically.

◆ Zapier/Webhooks

Explanation:

Connect CRM with multiple external apps.

Example:

New lead → automatically added to Google Sheets.

◆ Slack Integration

Explanation:

Send CRM updates to team communication tools.

Example:

Deal closed → notification sent in Slack channel.

◆ 4. CRM DATA FLOW – Missing (Detailed)

◆ Lead Nurturing Stage

Explanation:

Engaging leads before they are ready to buy.

Example:

Send emails, messages until customer shows interest.

◆ Customer Onboarding

Explanation:

Process after deal closure to start service/product usage.

Example:

Assign onboarding tasks after customer purchase.

◆ Support Flow

Explanation:

Handling customer issues after sale.

Example:

Customer raises complaint → ticket created → resolved.

◆ Renewal Tracking

Explanation:

Tracks repeat business or subscription renewals.

Example:

Reminder sent before subscription expiry.

◆ 5. FLOW DIAGRAM – Missing (Detailed)

◆ Lead Nurturing Loop

Explanation:

Leads not ready are continuously engaged.

Example:

Customer says “not now” → system sends follow-ups → re-engages later.

◆ Re-engagement Flow

Explanation:

Reconnect with lost opportunities.

Example:

Lost deal contacted again after 3 months.

◆ Support Cycle

Explanation:

Tracks issue resolution lifecycle.

Example:

Issue raised → assigned → resolved → closed.

◆ Upsell / Cross-sell Flow

Explanation:

Sell additional or higher-value products to existing customers.

Example:

Customer buys basic plan → later offered premium plan.
