

COMPLETE CRM FLOW (DEVELOPER-FRIENDLY)

◆ 1. Lead Capture

What happens:

Leads enter the system from different sources like website forms, ads, manual entry, or integrations.

Example:

A user fills a form on your website → lead is created in CRM.

Why it matters:

This is the **starting point of all sales activity**.

◆ 2. Lead Validation (Deduplication & Data Check)

What happens:

System checks if the lead already exists and validates required data (phone/email).

Example:

Same number already exists → system updates old lead instead of creating new one.

Why it matters:

Prevents duplicate leads and confusion for sales team.

◆ 3. Lead Queue (Unassigned Pool)

What happens:

All new leads go into a common pool before assignment.

Example:

50 leads from campaign → stored in queue → waiting for assignment.

Why it matters:

Ensures **no lead is missed**.

◆ 4. Lead Assignment

What happens:

Leads are assigned to sales reps manually or automatically (round-robin/territory-based).

Example:

Hyderabad leads → assigned to Hyderabad sales rep.

Why it matters:

Ensures **right person handles the lead quickly**.

◆ 5. First Contact / Initial Follow-up

What happens:

Sales rep contacts the lead via call, email, or WhatsApp.

Example:

Sales rep calls within 1 hour of lead creation.

Why it matters:

Faster response = higher conversion chances.

◆ 6. Lead Qualification

What happens:

Sales rep checks if the lead is genuine and interested.

Example:

Customer confirms requirement → marked as “Qualified”.

Why it matters:

Separates **serious buyers from time-wasters**.

◆ 7. Lead Nurturing (If Not Ready)

What happens:

If lead is not ready, system keeps engaging through follow-ups.

Example:

Customer says “call later” → CRM schedules reminders and sends emails.

Why it matters:

Prevents losing future opportunities.

◆ 8. Lead Conversion

What happens:

Qualified lead is converted into:

- Contact (person)
- Account (company)
- Deal (opportunity)

Example:

Lead becomes customer record + deal created.

Why it matters:

Moves from **lead stage to actual sales pipeline**.

◆ 9. Deal Creation

What happens:

Sales opportunity is created with value, products, and expected closure date.

Example:

Deal worth ₹2 lakh created for software sale.

Why it matters:

Tracks potential revenue.

◆ 10. Deal Progression (Pipeline Movement)

What happens:

Deal moves through stages:

- Prospecting
- Qualification
- Proposal
- Negotiation

Example:

Proposal sent → deal moves to “Negotiation”.

Why it matters:

Helps track where deals are getting stuck.

◆ 11. Activities Execution (Tasks / Calls / Meetings)

What happens:

Sales team performs activities linked to deal.

Example:

Call → meeting → demo → follow-up.

Why it matters:

Ensures continuous engagement with customer.

◆ 12. Quote Creation

What happens:

Formal quotation is created with pricing and products.

Example:

Quote sent to customer with ₹2 lakh pricing.

Why it matters:

Official step before closing deal.

◆ 13. Negotiation

What happens:

Customer discusses pricing, terms, or conditions.

Example:

Customer asks for discount → sales team negotiates.

Why it matters:

Final stage before decision.

◆ 14. Deal Closure

What happens:

Deal is marked as:

- Closed Won (success)
- Closed Lost (failure)

Example:

Customer accepts → deal marked “Won”.

Why it matters:

Determines revenue outcome.

◆ 15. Order / Invoice Creation

What happens:

After winning deal, system generates order and invoice.

Example:

Invoice sent to customer for payment.

Why it matters:

Starts financial transaction.

◆ 16. Payment Tracking

What happens:

Track whether payment is completed or pending.

Example:

Invoice shows “Paid” or “Pending”.

Why it matters:

Ensures revenue collection.

◆ 17. Customer Onboarding

What happens:

After payment, service/product delivery begins.

Example:

Account setup or product delivery initiated.

Why it matters:

Ensures smooth customer experience.

◆ 18. Customer Support (Post-Sales)

What happens:

Customer issues are tracked and resolved.

Example:

Customer raises complaint → support team handles it.

Why it matters:

Improves customer satisfaction.

◆ 19. Renewal / Repeat Sales

What happens:

System tracks future opportunities from same customer.

Example:

Subscription renewal reminder after 1 year.

Why it matters:

Generates long-term revenue.

◆ 20. Reporting & Analysis

What happens:

System generates reports for management.

Example:

Monthly sales report, conversion rates.

Why it matters:

Helps improve business decisions.

✅ FINAL SIMPLE FLOW (FOR QUICK REFERENCE)

👉 Lead Capture

- Validation
- Queue
- Assignment
- Contact
- Qualification
- Nurturing
- Conversion
- Deal
- Activities
- Quote
- Negotiation
- Closure

- Invoice
- Payment
- Onboarding
- Support
- Renewal
- Reports

👉 “Each stage should be independently trackable and connected — no step should be skipped.”
